

Founded in 2009, Shenzhen Datang Computer Company Limited (with the brandname “Maxtang”) has become a leading industrial computer hardware manufacturer, focusing on research, design, manufacturing and sales.

With its advanced technology and professional engineers, Maxtang leads the industry through cutting-edge innovation and design and is dedicated to providing global enterprises and customers with custom-built and cost-effective products and solutions. In the recent years, Maxtang has been growing rapidly and has gained reputation in the Chinese industry as a quality manufacturer.

Driven by innovation and committed to quality, Maxtang won many awards in these years. Maxtang acquired "China National High & New Technology Enterprise" qualification and became the member of Intel® IoT Solutions Alliance. It has the ISO9001:2015 certification for the quality assurance system. Also Maxtang is named as Certified HDMI® Adopter by HDMI, which further demonstrates our ongoing commitment to offer our customers products and services with the highest quality performance and long-term reliability.

Maxtang provides global market with cost-effective motherboards, fanless mini computers with high quality and stable performance. Maxtang’s embedded computers are designed to simplify project management and deployment by offering fully enclosed, fanless, ultra-compact and modular computer designs with a wide selection of processors, chipsets, memory sizes, and COM ports. Its products are used in wide application areas of Commercial Display, Industrial Automation, Intelligent Transportation, Robotics, Machine Vision, Cloud Computing, Retail Terminal and other areas.
